PORTFOLIO

## EXPERIENCE

### • OctaNet Services Pvt Ltd, Remote — Web Developer Intern

May 2024 – Present

- As a Web Developer Intern, I aim to leverage my passion for coding and creativity to contribute effectively to innovative web development projects while gaining valuable hands-on experience in the field.
- Proficient in HTML, CSS, JavaScript, and Tailwind.
- Experience with modern web development framework such as React.js
- Understanding of responsive design principles and cross-browser compatibility.
- Ability to collaborate effectively in a team environment and communicate technical concepts clearly.

### • Qualsquad infotech Pvt Ltd, Hyderabad — Data Annotator

June 2021 – November 2022

- Successfully annotated large datasets to train machine learning models, ensuring accuracy and reliability in data labeling.
- Collaborated with cross-functional teams to develop data annotation guidelines and standards, improving overall annotation efficiency and consistency.
- Conducted thorough quality checks on annotated data, promptly identifying and rectifying any errors or inconsistencies to maintain high data integrity.

## EDUCATION

### • Sree Chaitanya College of Engineering, Karimnagar

2015–19

Bachelor of Technology in Mechanical Engineering

Percentage: 65

## PROJECTS

### • Blinkit clone website || GitHub Repo

Dive into core web development concepts by constructing a static version of the Blinkit website.

- This project involves creating an engaging interface using HTML, CSS and Bootstrap.
- This project emulates Blinkit's distinctive layout and design, without incorporating dynamic features.
- **Tech Stack:** HTML, CSS and Bootstrap.

### • Jira-Scrum Boards || GitHub Repo

A website where Every team member can constantly visualize project progress with a scrum board.

- This project involves creating an engaging interface using HTML, CSS and JavaScript.
- The board provides a visual representation of the work in progress, making it easy for team members to understand what tasks are currently being worked on, what's in the backlog, and what has been completed.
- **Tech Stack:** HTML, CSS and JavaScript.

### • Brick-Breaker Game

A simple Brick Breaker Game where the ball break the bricks while being reflected by the slider.

- Developed a Brick Breaker game using Java Swing as a personal project.
- Implemented various game mechanics, including paddle movement, ball physics, brick collision, and scoring system.
- **Tech Stack:** Java swing and AWT.

## TECHNICAL SKILLS

**Programming Languages:** C++, Java, Javascript, Structured Query Language.

**Technologies/Frameworks:** HTML, CSS, Bootstrap, Tailwind CSS, React, Redux Toolkit, Rest API's, MYSQL.

**Developer Tools:** VS Code, GitHub, NPM, Postman.

**CS Fundamentals:** Data Structure and Algorithms, Operating System, OOPs, Database Management System.

## ACHIEVEMENTS

- Attend 24 coding contest in Acciojob portal and score more than 85 percent in all contest.
- Completed over 200 various types of Java programming problems in the last 6 months.
- Best employee of the month award.
- Best performance award in the college.
